

Multiple Species Hardwoods

With more than 2500 items available in up to ten species of hardwood, The Premium Series® offers an unparalleled array of design options. Select from hardwood mouldings, carvings and moulding accessories, including radius pieces, corner blocks and plinth blocks. No other architectural finish-trim program in the U.S. presents you with this remarkable variety of hardwood products, all designed to work together.

Alder—With its even color, easy workability and consistent grain structure, Alder is a hardwood that accepts a variety of stains and is good for any application and finish.

Beech—With its uniform color and grain, minimal defects, and good lengths, Steamed European Beech is a high quality hardwood that is an excellent cost effective alternative to Alder.

Cherry—A favorite in American homes, this rich and lustrous hardwood reveals its unique character with a combination of reddish colors, smooth fine grain and lighter highlights.

Maple—With every board hand selected for nearly all white color, this traditional hardwood has a tight grain, firm texture and an excellent uniform look when finished naturally or stained.

Mahogany--With its deep reddish-brown tones, elegant warmth and natural beauty, this highly valued exotic hardwood completes the finest interior spaces.

Poplar—The ultimate paint-grade hardwood providing sharp, crisp details for a painted finish second to none. Light colored Poplar can also be used for economical stained applications.

Red Oak—A great value in hardwoods, Red Oak has been the most widely used and best known American specie due to its color, open grain and the many finish options it offers.

Sapele—Since this beautiful exotic hardwood has an even color and grain, and is virtually defect free, it is a highly desirable and cost effective alternative to Genuine Mahogany.

Walnut-Known as the King of Hardwoods, American Black Walnut has long been prized by furniture and cabinet makers for its dark, rich tones, fine smooth finish, and lustrous depth.

White Oak—Used for fine furniture, cabinetry and elegant architectural applications, White Oak offers a more refined grain pattern and unique appearance than all other Oaks.

What's New In This Catalog

This newest edition of *The Premium Series*® Architectural Finish Products catalog has over 30 additional pages, offering 35 new designs and over 300 additional products. Many of the new products are being offered in response to requests for moulding availability in additional hardwood species and more design options for our most popular moulding collections. With the addition of Beech and Sapele hardwoods to *The Premium Series*® mouldings, you may now choose from up to ten hardwood species. Matching accessories, including radius corners, plinth blocks, flexible resin moulding and hardwood carvings are all available to complete any installation.

Beech, also known as Euro Steamed Beech is an European hardwood import. Uniform color, versatility, and lengths longer than Alder make it a great addition to *The Premium Series*®.

- · An economical substitution for Alder
- Nearly defect free
- Takes finish and stains well
- Substitute for Cherry and Walnut when stained to match
- Matching lumber and plywood readily available

Sapele is harvested in Africa and has a fine texture with red to dark reddish-brown color.

- An economical substitute for Genuine (Honduras) Mahogany
- More consistent color and grain
- Virtually no worm holes or defects
- Better length availability
- Mouldings machine without tear-our or fuzzing
- Matching lumber and plywood readily available

In addition to the new products and expanded hardwood species introduced in this catalog, several new features have been added to make this catalog a valuable design and installation resource.

Design Options for sprung crown 3366 are shown on page 99 and a selection of "cabinet crowns" for kitchens and entertainment centers are on pages 104 and 105. The many insert mouldings used with new crown mouldings 3382 and 3383 are shown on pages 130 and 131.

Installation and finishing of flexible resin mouldings and guidelines for installing radius panel mouldings are included in the Moulding Accessories section. Wainscotting and Paneled Wall construction is detailed on page 204 of the Application Guide.

Expanded stain grade design options in the Application Guide now have the MS symbol to show availability in up to ten wood species.

The mouldings below are *Premium Series*® Mouldings now offered in Multiple Species and/or added to the MDF Moulding Collection. See the other side of this page for a complete listing of the new hardwood and MDF products added in this catalog.

Now you can choose from more than 330 profiles in up to ten wood species, all produced from the finest hand selected hardwood, including paint grade. Architectural excellence and professional installation are easy to achieve with matching accessories, including radius corners, plinth blocks, flexible resin mouldings and intricate hardwood carvings.

All our products are designed to work together seamlessly in style, fit and function. Whether your project is a simple room remodel, an elegant custom home or a highend commercial interior, *The Premium Series*® contains everything you need to create beautifully finished interior spaces. Our commitment to the highest standards of design and quality has made *The Premium Series*® the choice of leading architects, designers and builders nationwide.

About the Catalog

The Premium Series® consists of over 2500 *in-stock* hardwood products. To help you quickly locate the ones you need, this catalog organizes them into twelve handy sections. Large, clear drawings, labeled with installed measurements, enable you to visualize each item in three dimensions.

A new focus on the total look one can achieve with *The Premium Series®* sets this catalog apart from its forerunners. Five unique, coordinated moulding collections are presented with detailed sketches of individual rooms. Choose an entire collection, combine elements from other sections of the catalog, or let our illustrations give your imagination free rein.

You'll find more assistance in the Application Guide (p. 197 to 228) and in the Moulding Selection Guide (p. 229 to 232). They show how pieces fit together and which mouldings are appropriate for various room sizes. In addition, our user friendly Product Index lists products in numerical order, with a thumbnail image, dimensions and page references.

About the Company

Founded in 1947, Saroyan Lumber Company is one of the largest manufacturers of high quality hardwood mouldings and architectural finish trim products in the United States. Our plants in California, Indiana and Kentucky all combine traditional woodworking values with the latest manufacturing technology.

Four generations of family ownership and hands on management have upheld Saroyan Lumber's original principles of quality, integrity and personal service. We place the highest value on the customer loyalty we've developed over the years as we strive to satisfy your most exacting requirements.

We have made it easy for you to
find Premium Series® products. On
this page they are listed by category.

The **Moulding Selection Guide** organizes complementary moulding designs by room size. See page 229.

The **Index** lists all profiles in numerical order, with thumbnail images, dimensions and page locations. See page 233.

Moulding Collections (p. 1-72)

Find the architectural style that defines your project as you browse our five distinctive interior moulding collections. In addition to full color illustrations, detailed sketches of model rooms offer a springboard for your creative ideas. Each collection is designed to stand on its own, or you can combine mouldings from different collections to suit your personal taste. *The Premium Series*® Collections provide complete design flexibility.

Hardwood Mouldings (p. 73-120)

The Premium Series® is the largest, most diverse, coordinated moulding program available in the U.S. from a single manufacturer. These in-stock products are manufactured from quality hardwood, using the latest woodworking technology. Mouldings are available in as many as ten wood species, ensuring professional results for the most challenging design and multi species installations. All paint grade mouldings are manufactured from solid, durable hardwood, providing sharp, crisp details and superior finish qualities.

Multiple Species Mouldings (p. 121-140)

With over 100 profiles stocked in ten hardwood species, *The Premium Series*® offers an unparalleled selection of Multiple Species Mouldings. (*See inside front cover for list of species*.) Multiple Species profiles are designed to coordinate with all of *The Premium Series*® Collections. A virtually unlimited range of design possibilities is at your fingertips, without the cost of custom runs. Select from a complete range of wood species and a full array of matching hardwood accessories, radius work and carvings. *The Symbol denotes multiple species availability*.

Ultra-Lite MDF Mouldings (p. 141-152)

Designed to coordinate with all of our hardwood collections, *Premium Series*® Ultra-Lite MDF Mouldings are the most economical solution for paint grade applications. State of the art millwork and prime coating provide the finest finished product. MDF profiles are typically stocked in 17 foot lengths.

Palassé Mouldings (p. 153-166)

Using techniques reminiscent of Old World craftsmanship, each Palassé Moulding is made from our own handmade masterpiece. Crafted from high quality solid hardwood, these embellished mouldings display elegant, artistic detailing. Each Palassé Moulding coordinates seamlessly with our other hardwood products and can be used as an accent in special areas or throughout a project for a spectacular architectural statement.

Hardwood Carvings (p. 167-176)

Corbels, carved corners, rosettes and appliqués, stocked in eight species of hardwood and rigid resin, are designed to fit with other *Premium Series*® products, providing the ultimate in architectural detailing. In the tradition of fine woodworking, each unique *Premium Series*® Carving is produced from a meticulously hand-carved original.

Moulding Accessories (p. 177-186)

A complete line of in-stock Moulding Accessories is available, including flexible resin mouldings, stock and custom radius pieces, plinth blocks, corner blocks and radius panel moulding. Stocked in up to ten species of hardwood to match and complement our other wood products, these high quality accessories help you achieve a fully detailed professional installation.

Flooring Accessories (p. 187-196)

Premium Series® Flooring Accessories include a comprehensive selection of in-stock hardwood flooring products. Many items, including stair treads, risers, nosing and other wood pieces, are available in up to 27 species, facilitating the complete professional installation of any hardwood floor. In addition to stocked accessories, custom hardwood parts can be manufactured to the specifications of any drawing or template.

Moulding Application Guide (p. 197-228)

The Moulding Application Guide shows you how different mouldings can fit together and how they will look installed. Three dimensional drawings demonstrate how you can create diverse architectural elements for any project by combining *Premium Series®* mouldings.

Moulding Selection Guide (p. 229-232)

Choose individual profiles quickly by room size and style with the Moulding Selection Guide. It's the easy way to ensure that your moulding selection is appropriate for the architectural scale of your project. The Moulding Selection Guide also shows many of the profile combinations available in *Premium Series*® Collections. References to the Moulding Application Guide direct you to a range of options for trimming doors, windows, walls, ceilings, fireplaces, and mantles.

The Roxbury[™] Collection

Infinitely adaptable to your personal touch,
the Roxbury™ Collection lends warmth and graciousness
to every architectural style. Roxbury™ effortlessly
blends with all of our other collections, enhancing
both large and small interior spaces. Available
in up to ten wood species.

Refer to the Selection Guide (pages 229 to 232) and the Moulding Application Guide (pages 197 to 228) for additional design options.

Hardwood Mouldings

The Premium Series® is the largest, most diverse coordinated moulding program available in the U.S. from a single manufacturer.

These in-stock products are manufactured from quality hardwood, using the latest woodworking technology. Mouldings are available in as many as ten wood species, ensuring professional results for the most challenging design and multi-species applications.

All paint-grade mouldings are manufactured from solid, durable hardwood, providing sharp, crisp details and superior finish qualities.

FLOORING SPECIES: Additional stocking species are listed on Pages 194-195.

MULTIPLE SPECIES: Also stocked in Alder, Beech, Cherry, Honduras Mahogany, White Maple, Red Oak, Sapele Mahogany, Walnut, and White Oak.

Moulding Accessories

A complete line of in-stock Moulding Accessories is available, including flexible resin mouldings, stock and custom radius pieces, plinth blocks, corner blocks and radius panel moulding.

Stocked in up to ten species of hardwood to match and complement our other wood products, these high quality accessories help you achieve a fully detailed professional installation.

Fig. 37
Radius Corner Blocks are available for all stock or custom Base, Chair Rail, and Crown profiles. Wooden segments are designed to fit standard ³/₄" radius drywall corners.

Corners can be manufactured in any wood species and are available in custom radii upon request.

Fig. 38In addition to Curved Hardwood and Ultra-Lite MDF, Flexible Resin Bases are made to match every stock or custom profile.

Resin mouldings conform to contours and allow economical installations on curved walls.

ABOUT FLEX MOULDINGS...

Many of *The Premium Series*® base mouldings, base shoe and panel mouldings are stocked in twelve foot pieces of Flexible Resin Moulding for immediate shipment. Otherwise, flex mouldings are made to order on a custom basis. Consult your qualified representative and be sure to provide proper measurements and/or templates when ordering custom resin mouldings.

Unpacking—Upon receiving the flex moulding, lay it flat to relax it. For easier installation in cold temperatures, lay it flat in the sun or use a heat gun. Do not over-heat, just warm material to the touch.

Nailing—To avoid splitting, pre drilling nail holes is recommended for larger fasteners and finish nails (14-16 gage) should not be placed closer than 1/4" from the edge of moulding.

Adhesives—Panel adhesive and "super glues" can be used as long as fasteners are used to hold material in place until adhesives bond and dry thoroughly.

Prep for paint—Prior to painting or staining, all flex resin should be washed with a solvent such as Acetone or MEK. Clean all oil residues around nail holes from pneumatic nail guns, fingerprints, etc. Always allow solvents to completely dry before finishing. Seams and nail holes can be filled with auto body filler. Extreme care must be taken with wood grain flex mouldings to make sure grain is not sanded out when finishing holes and joints. Your final finish results depend upon your preparation.

Priming—Flex mouldings should be primed before painting. A good quality water based primer is required for alkyd enamel or oil based finish coats. Water based enamel can also be used as a primer.

Painting—Flex resin moulding can be painted with all paints such as latex, enamels, alkyd enamels and oil based paints after the proper preparation steps above are followed. Note: alkyd enamels and oil based paints may not dry properly if a water base undercoat is not applied first.

Staining— Flex mouldings can be finished to achieve a quality stained finish with proper tinted primers and gel stains. Extreme care must be taken with wood grain flex to make sure the grain is not sanded out. **Remember to always practice on a test piece first!**

All mouldings stocked in Paint Grade Hardwood.

Curved Hardwood, Lightweight MDF and Flexible Resin Crowns are available to accommodate both convex and concave applications as illustrated. All stock or custom crowns can be made to match any wall radius or curve.

Curved Hardwood, Lightweight MDF and Flexible Resin Casings provide simple solutions to all types of curved openings. From Elliptical to Half-round, Eyebrow or Oval; mouldings are available for all stock or custom profiles.

5529 Straight Applied Moulding

Rosette Carving 9204 and Corner Carvings 9234, 9236 and 9238 are designed to fit all 41/2" Radius Panel Mouldings.

Radius Panel moldings are stocked as quarter circles with square ends. Slight adjustments to profile at joints may be necessary during installation. Radius moulding profiles are optimized for best fit to straight mouldings when used as a quarter circle. Panel Moulding drawings are 1/4 scale.

Please see pages 174 and 175 for additional illustrations.

5513 Straight Rabbetted Panel Moulding

All mouldings stocked in Paint Grade Hardwood.

There is more than one way to determine the proper cuts when installing radius panel moulding. Here is a simple method that does not require any special measuring tools. In fact, this method can also be used for a variety of non-standard miter cuts such as when installing radius casing over an arch head door. The instructions below are for a 6" radius panel moulding.

Step 1. Draw perpendicular lines "A" and "B" to determine the intersection point "C". These lines define one corner of the panel layout. (See Fig. 46 at right)

Step 2. Using a piece of straight panel moulding as a guide, draw lines "D" and "E".

Step 3. Measure back 6" from point "C" to create intersection points "F" and "G". If installing a 4½" radius moulding, measure back 4½". Likewise, 12" for a 12" radius moulding.

Step 7. Make all cuts and then assemble using glue and finish nails. The profile of the radius panel moulding has been specially modified to give an ideal fit at the joint with the straight moulding; therefore, a minimum of touch-up is required to finish the installation. (See Fig. 48 at right)

Step 4. Place the radius panel moulding so it crosses lines "A" and "B" at the points "F" and "G". Trace along the inside and outside of the radius panel moulding. (See Fig. 47 at left)

Step 5. With the mouldings out of the way, draw the dashed "cut lines" (----) through the intersections of the straight and radius panel moulding outlines.

Step 6. Place the mouldings on the layout one at a time and transfer the "cut line" to each one.

All mouldings stocked in Paint Grade Hardwood.

All mouldings stocked in Paint Grade Hardwood. MULTIPLE SPECIES: Also stocked in Alder, Beech, Cherry, Genuine Mahogany, White Maple, Red Oak, Sapele Mahogany, Walnut, and White Oak.

Flooring Accessories

Premium Series® Flooring Accessories include a comprehensive selection of in-stock hardwood flooring products. Many items, including stair treads, risers, nosing and other wood pieces, are available in up to 27 species, facilitating the complete professional installation of any hardwood floor.

In addition to stocked accessories, custom hardwood parts can be manufactured to the specifications of any drawing or template.

Custom Plank Flooring can be manufactured in any thickness, width, species and designed to meet your specific installation requirements. Flooring can also be ordered with either a square edge or bevel edge. Sizes are shown below, groove sizes are overall installed dimensions.

Moulding Application Guide

The Moulding Application Guide shows you how different mouldings can fit together and how they will look installed. Three-dimensional drawings demonstrate how you can create diverse architectural elements for any project by combining Premium Series® mouldings.

The Moulding Selection Guide shows many of the profile combinations available in the Premium Series® Collections. It will help you select mouldings that are appropriate for the architectural scale and style of your project.

Plinth Blocks not only provide interesting architectural detail, they also can provide an installation solution to join bases that are too thick for the casing. When selecting your casing in this catalog, notice the corresponding diagram that shows recommended plinth block options.

Traditional Plinth Blocks fit all casings 13/16" thick or less. Easily modified by width and height, they can be used throughout a project with different size casings and baseboards.

Profiled Plinth Blocks have a variety of profiles to create a totally custom look. Blocks are typically 8" tall for installation flexibility and can be cut to 4" for use with 3³/₄" or samller bases. If desired, plinth blocks can be trimmed on the side for a better fit with the casing.

Backbands can be used to increase the thickness of a casing to accept larger or thicker base mouldings. From an installation standpoint, base and casing installations look best when the baseboard terminates into the side of a casing that is thicker than the base moulding (See Fig. 52). They also offer the flexibility to create unique casing designs using a combination of *Premium Series*® mouldings (See Fig. 53).

See the Moulding Selection Guides for moulding sizing suggestions. All mouldings stocked in Paint Grade Hardwood.

Panel Mouldings 5516 and 5519 are our unique multiple species profiles that allow for the easy creation of custom Wainscotting and Paneled Wall designs. Use solid hardwood or hardwood plywood for the frame and panels. With a wide selection of chairrail and base mouldings also available in up to nine hardwood species, many design options are possible. (See Fig. 68)

Paint Grade Wainscotting designs can be made with Panel Mouldings 5516 and 5519. Use poplar hardwood, plywood or MDF sheets for frame and panels. If constructing with MDF or plywood, use the cut-out pieces from the frame to make the panels. (See Fig. 69)

About The Materials

Every effort has been made to provide a product of superior quality and value. Most drawings in the catalog are full size. Actual sizes and profiles may vary slightly from catalog illustrations and dimensions. Samples are available upon request for a nominal fee. Because hardwood is a product of nature, natural variations in color, texture, and grain pattern are inherent and should be expected. Material supplied will require normal surface preparation prior to stain or finish.

Random Lengths

Solid hardwood mouldings are manufactured from random length lumber. Paint-grade mouldings are typically available in 8 to 16-foot lengths. Due to the nature of different hardwood species, some Multiple Specie items are limited in length availability. On random-length orders, Saroyan Lumber makes every effort to ship an appropriate assortment of lengths based on the species as well as the profile type and size. Random-length orders may include a maximum of 15% 3-to-7-foot lengths. MDF profiles are typically stocked in 17-foot lengths.

Specified Lengths

Stock moulding orders of specified lengths will incur an additional charge. A combination of available lengths will be pulled to achieve the lengths ordered and there may be up to a 10% overage to meet your length requirements. This overage shall be deemed acceptable by Buyer and not subject to credits or refunds. All reasonable efforts will be made to minimize overage. If over-shipments are greater than 10%, you will be notified prior to shipment for approval. Specified 16-foot lengths are subject to availability and will incur an additional charge. Instead of combining your shorter lengths and specifying long lengths, it is to your advantage and more economical to specify the actual lengths you need.

Payment and Terms

Saroyan Lumber Company accepts both company and personal checks upon verification and approval. Payments by check for C.O.D. orders must be pre-approved. Proper identification is required. Standard open account terms are 1% 10-DAYS, NET 30 on approved credit. Discounts are not allowed on sales tax, delivery charges, millwork, or other finishing services. If an account is delinquent, Saroyan Lumber reserves the right to hold orders or reschedule deliveries. Saroyan Lumber also reserves the right to change credit limit and/or payment terms when, in our opinion, Buyer's financial condition or previous payment record warrants such action.

Product Availability and Pricing

All items are normally stocked in Saroyan Lumber's warehouse, and orders are usually ready for Will Call or delivery within 24 hours. Please call to verify availability. Buyers are requested to fax orders whenever possible. Prices are based on random lengths unless specified lengths are requested. Quotations are based on immediate acceptance unless otherwise specified. Orders are accepted subject to pricing in effect at time of sale. Price and availability are subject to change without notice.

Delivery

Prices quoted are F.O.B. our facilities unless otherwise stated in writing. Saroyan Lumber ships throughout the United States and worldwide utilizing company trucks, common carriers, and United Parcel Service. Call for information and costs. Proper loading of Will Call or common carrier vehicles is carrier/Buyer's sole responsibility. Buyer assumes full responsibility for loss or damage of Will Call goods in transit. Regardless of F.O.B. point, claims for any goods damaged in transit must be made with carrier. Any visible damage to product or packaging must be noted on shipper's paperwork at time of delivery. Please call ahead for delivery and Will Call schedules.

Special Orders

Flexible resin moulding, radius corners, custom wood radius work, and all other non-stock items are considered Special Orders and <u>are not subject to returns, refunds, or exchanges</u>. A deposit, or advance payment, is usually required on Special Order items. Special Orders are not subject to cancellation after production has begun.

Returns and Variances

Once an item has been pulled from stock and packaged for shipment, a restocking charge will apply to cancelled orders. No product or service variance will be considered for adjustment unless notification is made within five days of receipt of material. Buyer must supply a copy of the original shipper or invoice. All shipments must be held intact for Saroyan Lumber inspection and tally. No material shall be returned without prior written approval. Material must be returned intact, in original condition, within 15 days of receipt. No partial return of any item is allowed without specific authorization. Material not returned in original condition or within 15 days of receipt will not be considered for credit, and, at Seller's option, will be returned to Buyer. Returns are subject to a 20% restocking charge (\$10 minimum). Return cartage is Buyer's responsibility. Credits or refunds for eligible material will be made only after receipt of material.

ANY ITEM THAT HAS BEEN INSTALLED, CUT, GLUED, FINISHED, SHOWS SIGNS OF JOB SITE NEGLECT, HAS BEEN DAMAGED IN TRANSIT BY BUYER, OR MODIFIED IN ANY WAY SHALL BE DEEMED ACCEPTED BY BUYER AND IS NO LONGER THE RESPONSIBILITY OF SELLER; NO RETURNS OR CREDITS ALLOWED. This includes items that have been marked with any type of pencil or pen, exposed to moisture or sun, or have any blemishes from paint, stain, drywall joint compound, or dirt.

Please note: Due to differences in material and manufacturing processes, a slight profile variance can be expected between wood and resin products.

Limitations

Product warranty information, liability, and complete Terms and Conditions of Sale are available upon request and are printed on the reverse of every shipper and invoice. Prior to purchase, it is Buyer's responsibility to make himself aware of all Terms and Conditions of Sale. Saroyan Lumber is not liable for indirect, special or consequential damages under any circumstances, including but not limited to damages or loss resulting from inability to use materials, increased operating costs or loss of production, attorney's fees, or any other damages. In all cases, Seller's maximum liability, whether resulting from breach of contract, negligence, or otherwise, shall not exceed the contract price of the materials supplied to Buyer.

244 Map

The Premium Series® offers more than 330 profiles in up to ten wood species, all produced from the finest hand-selected hardwood, including paint-grade. Architectural excellence and a professional installation are easy to achieve with matching accessories, including radius corners, plinth blocks, flexible resin mouldings and intricate carvings. Decades of experience manufacturing decorative wood products for a demanding clientele have led us to create an in-stock moulding selection that is second to none.

All paint-grade mouldings are manufactured from solid, durable hardwood without finger joints, providing sharp, crisp details and superior finish qualities.

All our products are designed to work together seamlessly in style, fit and function. Whether your project is a simple room remodel, an elegant custom home or a highend commercial interior, *The Premium Series*® contains everything you need to create beautifully finished interior spaces. Our steadfast commitment to the highest standards of quality and design has made *The Premium Series*® the choice of leading architects, designers and builders nationwide.

Ask for our FSC*-certified products.

As a division of Saroyan Lumber Company, Saroyan Architectural is pleased to offer many quality products and services. The availability of these products and services, combined with the mouldings in this catalog, provide you with a single resource for Architectural Finish Products that is second to none.

CUSTOM MILLWORK

- West Coast's largest manufacturer of custom hardwood mouldings.
- Design and manufacture of the most intricate mouldings and radius work.
 - Ability to produce to virtually any sample or drawing.
 - S4S, resaw, cut to length, dado, glue up, flat sanding.

LUMBER PRODUCTS

- Largest and most diverse hardwood inventory in the Western United States.
 - Over four million board feet of lumber.
 - Every specie from Alder to Zebrawood.

HARDWOOD FLOORING

- Largest Hardwood Flooring manufacturer on the West Coast.
- In-stock and custom hardwood flooring; largest selection of widths and lengths.
- Accessories to match any wood floor; Treads, Risers, Nosings, Shoes, Feature Strips.
 - Hand Distressing, Wire Brushing, Square and Round Pegging.
 - Stock and Custom Patterns and Parquets.

OTHER PRODUCTS AND SERVICES

- Complete line of stock hardwood plywood, Particle Board, MDF, Melamine.
- Polyurethane mouldings, medallions, domes, niches, and other architectural accessories.
- · Large selection of fiberglass columns in stock, load bearing wood and fiberglass columns.
 - Catalog drawings are available in .dxf format for CAD.
